

S. K. Worm has been pre programmed to interact with the instructor. The presentation reinforces the Ohio Department of Educations benchmarks for Earth and Space science as they relate to soils in a fun and informative way the students are sure to remember.

S. K. Worm is made possible through the generous grants from the Ohio Environmental Education Fund, the Lake Erie Buffer Team, the Ohio Electric Cooperative, and the Natural Resources Conservation Service.

S. K. Worm

This project consists of a six foot tall museum quality animatronics model of the NRCS mascot S. K. Worm coming out of a detailed soil monolith. S. K. Worm will be transported in a trailer modified to promote an understanding of Ohio Geology, Ohio energy sources, and conservation practices.

“An Equal Opportunity Provider and Employer”

Get the Dirt on Soil With S. K. Worm

Available for the first time ever!
S. K. Worm— helping students be
naturally resourceful about
natural resources.
